CONDITIONED REFLEXES: AN INVESTIGATION OF THE PHYSIOLOGICAL ACTIVITY OF THE CEREBRAL CORTEX

By Ivan P. Pavlov (1927)

Translated by G. V. Anrep (1927)

[Lecture I.](#) The development of the objective method in investigating the physiological activities of the cerebral hemispheres. -- Concept of reflex. -- Variety of Reflexes. -- Signal-reflexes, the most fundamental physiological characteristic of the hemispheres.

[Lecture II.](#) Technical methods employed in the objective investigation of the functions of the cerebral hemispheres. -- Response to signals as reflex action. -- Unconditioned and conditioned reflexes.--Necessary conditions for the development of conditioned reflexes

[Lecture III.](#) The formation of conditioned reflexes by means of conditioned and direct stimuli. -- Agencies which can be used as conditioned stimuli. -- Inhibition of conditioned reflexes: External inhibition.

[Lecture IV.](#) Internal inhibition of conditioned reflexes: (a) Extinction

[Lecture V.](#) Internal inhibition of conditioned reflexes: (b) Conditioned inhibition

[Lecture VI.](#) Internal inhibition of conditioned reflexes: (c) Delay

[Lecture VII.](#) The analysing and synthesizing activity of the cerebral hemispheres: (a) The initial generalization of conditioned stimuli. (b) Differential inhibition

[Lecture VIII.](#) The analysing and synthesizing activity of the cerebral hemispheres (*continued*): (c) Examples of the analysis of stimuli. (d) Synthesis and analysis of compound simultaneous stimuli. (e) Synthesis and analysis of compound successive stimuli

[Lecture IX.](#) The irradiation and concentration of nervous processes in the cerebral cortex: (a) The irradiation and concentration of inhibition within a single analyser

[Lecture X.](#) Irradiation and concentration of nervous processes in the cerebral

hemispheres (*continued*): (b) Irradiation and concentration of inhibition over the entire cortex; (c) Irradiation and concentration of excitation

[Lecture XI](#). Mutual induction of excitation and inhibition: (a) positive induction. (b) negative induction

[Lecture XII](#). Interaction of irradiation and concentration of with induction

[Lecture XIII](#). The cortex as a mosaic of functions: (a) Examples of the mosaic character of the cortex and the more obvious ways in which this character is acquired; (b) Variability of the physiological properties of different points of the cortex in some instances, stability in others. -- The cortex as a united complex dynamic system

[Lecture XIV](#). The development of inhibition in the cortex under the influence of conditioned stimuli

[Lecture XV](#). Internal inhibition and sleep as one and the same process with regard to their intimate mechanism

[Lecture XVI](#). Transition stages between the alert state and complete sleep: Hypnotic stages

[Lecture XVII](#). The different types of nervous system. -- Pathological disturbances of the cortex, Result of functional interference

[Lecture XVIII](#). Pathological disturbances of the cortex, Result of functional interference (*continued*)

[Lecture XIX](#). Pathological disturbances of the cortex, Result of surgical interference: (a) General disturbances of the cortical activity; (b) Disturbances of the acoustic analyser

[Lecture XX](#). Pathological disturbances of the cortex, Result of surgical interference (*continued*): (c) In the visual analyser; (d) In the tactile analyser; (e) Occurring after extirpation of the frontal lobes; (f) In the thermal cutaneous analyser; (g) Arising after extirpation of the gyrus pyriformis; (h) In the motor analyser

[Lecture XXI](#). Pathological disturbances of the cortex, Result of surgical interference (*continued*): Attempt to correlate the general postoperative behaviour of the animals with the disturbances in the activity of individual analysers

[Lecture XXII](#). The general characteristic of the present investigation and its special difficulties. -- Discovery of certain errors necessitating the modification of some earlier interpretations

[Lecture XXIII](#). The experimental results obtained with animals in their application to man
